

Purity 99% Nootropic Powder Supplements CAS 41100-52-1 Memantine HCl Raw

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Memantine HCl
- Cas: 41100-52-1
- Appearance: White Powder
- Purity: 99%
- Usage: Nootropic
- Highlight: **Memantine HCl Nootropic Powder Supplements , Purity 99% Nootropic Powder Supplements , 41100-52-1**

Product Description

Purity 99% Memantine HCl Raw Nootropic Powder CAS 41100-52-1

Product name	Memantine HCl
CAS no.	41100-52-1
Molecular Formula	C ₁₂ H ₂₂ ClN
Molecular Weight	215.76
Brand Name	Senwayer

Memantine hydrochloride is a medication used for the treatment of moderate to severe dementia in patients with Alzheimer's disease. It works by blocking the action of glutamate, a chemical messenger in the brain that is involved in learning and memory processes.

By blocking the excessive activity of glutamate, memantine can help improve cognitive function and slow down the progression of dementia symptoms. Memantine hydrochloride is usually prescribed in combination with other medications used to treat Alzheimer's disease, such as acetylcholinesterase inhibitors.

Memantine hydrochloride is available in the form of tablets and oral solution and is usually taken once or twice a day as directed by a healthcare professional. It is important to follow the dosage instructions carefully and not to stop taking the medication without consulting a doctor, as this can lead to a worsening of symptoms.

Like all medications, memantine hydrochloride can cause side effects, including dizziness, headache, constipation, and confusion. It is important to report any side effects to a healthcare professional, as they may require medical attention.
